

Sample output

Employees who held two or more Jobs

101

176

Results:-

The Code is executed successfully and got the output.

3. write a pandas program to display the details of Jobs in descending sequence on Job title.

Aim:-

To display the details of all jobs ; sorted in descending order based on the Job title

Pseudo Code:-

- ⇒ Import the pandas library
- Load the jobs data file into a pandas dataframe
- Sort the Datframe by the JOB-TITLE Column in descending order
- ⇒ Display and selected Datframe with all Columns.

Sample input

Job-ID	Job-Title	Min-Salary	Max-Salary
AD-PRES	President	20080	40000
AD-VP	Administration Vice president	15000	30000
FI-MGR	Finance Manager	8200	16000
SA-MAN	Sales Manager	10000	20080
PR-REP	Public Relations Representation	4500	10500

Sample output:-

The Job details sorted in descending order by Job-Title

Job-ID	Job-Title	Min-Salary	Max-Salary
SA-PRES	President	20080	40000
AD-VP	Administration Vice president	15000	30000
FI-MGR	Finance Manager	8200	16000
SA-MAN	Administration Vice president	15000	30000
PR-REP	President	20080	40000

Result:-

The code is executed successfully and got the output.
